Dear All,

As [REDACTED] said, in China, intellectual games (Texas Poker/Mahjong/Fighting Landlords/Chess/Various Poker Games) have started to be led by the government and started to issue licenses.

This traffic will be very large and Coolnetwork has mastered The target of the cooperation is the general agency of the China Sports Administration. Among many competitors, we expect to sign a cooperation agreement for online payment this Friday. After communicating with Marina, we will use Wanyuan (WD China) ) Come to sign an agent, this business will give WD agent profit, because this business is Zeyu's relationship, so I suggest to pull [REDACTED] into the WD team, he can be responsible for cross-border payment, and maintain the relationship of this intellectual game, attach CV, for your reference.

I have also communicated with the person in charge of Allscore. The contract is already in preparation. I will also prepare information to communicate with PBOC. Because this business is signed by WD, we can ask PBOC to agree to Allscore to operate this business.

regards,

[REDACTED]

Subject: Gambling industries

Hi [REDACTED]

Due to the recent COVID - 19 outbreak the country experienced, Chinese online economy has grown by a large factor and is now lifting its policy on strictly regulated recreational gambling industries. This change would apply to both online and offline environment. Aiming at replicating Macao and Vegas's success in Mainland China, a projected growth of online and offline gaming would take place very shortly. At this time, institutions are opening up their drafting pool for potential carriers for their financial transactions. Records indicated over 500 - 700 billion CNY transaction volume in the industry alone last year. As it's marketing window opens, I have personally contacted and managed a great source of connection with an enterprise for potential cooperation, and strongly recommend an industrial attention on this area.

Best,

[Redacted]
